

# DECORATIVE GLASS

TEMPERABLE  
LACQUERED GLASS

A photograph of a modern building's glass facade. The glass is dark and reflective, showing the silhouettes of people walking and standing in front of it. The building's structure is composed of vertical black frames. The scene is brightly lit, suggesting an indoor or well-lit outdoor environment.

ALL SPACES BRIGHTEN UP WITH  
TEMPERABLE LACQUERED GLASS

## TEMPERABLE LACQUERED GLASS

Temperable Lacquered Glass, is a lacquered glass which is created using a specially developed temperable paint on float glass, providing high aesthetical quality and elegant solutions for both interior and exterior applications.

Tempering offers solutions for the safety needs and provides many application areas to Temperable Lacquered Glass.

### ► **Product Advantages**

---

- Suitable for use in exterior applications and interior decoration.
- The lacquered side should face a surface.
- Allows for pre-tempering secondary operations (cutting, grinding, etc.).
- When the glass breaks, it breaks down into non-sharp small pieces, eliminating the risk of injury.
- Resistant to distributed loads up to 5 times compared to a non-tempered glass.

### ► **Applications**

---

- Cabinet fronts
- Furniture
- Partitions
- Wall coverings
- Shelves
- Spandrels
- Doors
